**The 66B comes in 4 formats:**

ABT0361	Block Terminal 66B with no block inserts
ABT0362	Block Terminal 66B with block insert 1A (2 pair) and block insert 2A (3 pair)
ABT0363	Block Terminal 66B with block insert 1A (2 pair only)
ABT0364	Block Terminal 66B with block insert 2A (3 pair only)

**The block inserts are also available separately:**

ABT0991	Block Insert 1A Complete With Fixing Screws
ABT1001	Block Insert 2A Complete With Fixing Screws

## Details:

For terminating 2 pair and 5 pair cables. 2 pair and 3 pair screw type inserts, supplied separately and fitted as required.

Block terminal 66B measures 125 × 90 × 42 mm, and is intended for external use. It contains two five-way screw terminal blocks similar to the familiar "chocolate block" and is intended for terminating and joining external cable such as drop wire.

The ends of the terminal screws that are in contact with the wire are pointed. It is intended that the wires should not be stripped prior to insertion, as is normally the case. Rather, the screw penetrates the installation to make the contact. For this reason, only one wire may be placed beneath each screw.

If a T-connection is desired in an exposed location, it is recommended that insulation-displacement jelly-filled splices be used housed within a 66B enclosure.

*This product superseded Block terminal No. 18. Maximum cable diameter up to 12mm.*
